ABOUT US

Wood Production Ltd, located in South London, was established to meet the demand for high quality, bespoke joinery from clients seeking something more than the usual products generally on offer by others.

Our clients crave that little bit extra, extra finesse, extra style, extra quality. Within the 10,000 sq. ft. factory, offices and showroom are of course the specialist machines one would expect. At the heart of our company is the highly skilled, dedicated and passionate workforce.

They proudly manufacture, assemble and administer multifarious range of products including, windows, doors, staircases, wardrobes, kitchens, bathrooms and flooring; for those who wish to surround themselves with warmth and beauty of wood.

Our products have been supplied to a wide variety of homes from apartments to mansions. No matter the size of the project, we strive to achieve maximum client satisfaction by not only managing the level of expectation but by being professional and acting responsibly.

From our base in London, not only are we supporting our clients from the UK, but also from all over the world, including the United States, Russia, Switzerland, Italy and Germany.

What makes Wood Production different (and our response is always the same) is that we consider our clients as we like to be considered.

TALK TO US

What drove you to create your company?

The origin of my response is simple, I just wanted to build a company that is very special and offer products and services that exceed the client's expectations. Whilst my philosophy will always remain the same; my desire to expand and grow the company in a number of directions still burns passionately within me.

How does one know how good something is?

When dimensions, materials, shapes and forms fit perfectly together; then the whole is greater than the parts and all seems effortless. You can then acknowledge you are looking at something very special.

It is beyond our comprehension to admit that anything is impossible

Why did you choose to work in wood?

Wood will always be available with good forest management, it is the perfect recyclable, environmentally friendly and sustainable material to work with. It is also such a beautiful natural material standing regally until ready, waiting to be fashioned into inspirations. The touch and warmth of it just affects my heart in the same way as the smile on a loved one's face.

What expectations do you have for the future?

Our world moves ever faster and with a vitality that embraces new ideas and stylised trends. We will be at the forefront. Challenging our imagination to transcend all boundaries and being creative to meet the needs of our

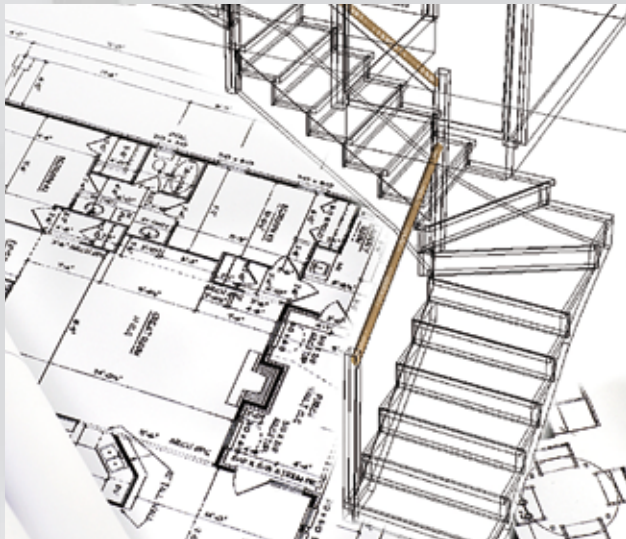

client's that will reflect our expertise and love of wood.

Why do you think Wood Production continues to be successful?

Our team, the people we employ are the cornerstone of the company. At the very heart are our craftsmen. Not only are they technically competent but dedicated and innovative. The craftsmen are the essence of Wood Production Ltd. We are more comfortable when others judge our work. All the team strive to ensure

that every item we produce should be a classical work of art, a sophisticated piece of engineering and to the exact specification of the client. The team we employ (including our craftsmen) will ensure that happens.

You have said in the past that *ambience is the most crucial element within a home; can you explain what you mean?*

Ambiance is the feeling of wellbeing generated by ones surroundings. It is the marriage of all the major parts evoking a

gracefulness and a calmness in tandem with flashes of excitement. Without it the spirit remains unenthusiastic.

High quality as well as natural material gives each client a feeling of comfort and luxury

Your signature logo is a tree; what does it represent?

It is a tree in the psalm of a hand. Trees have a life expectancy that may surprise. A group of pine trees in the northern hemisphere are estimated to be 8,500 years old. In France there is an old Oak that has been standing since 1683. The oldest know tree is a Norway Spruce found in Sweden and is 9500 years old..

A tree is a sign of longevity and endurance. Whilst the psalm is a part of the body that

nurtures whatever it touches. I think those two elements reflect what we strive for, endurance and nurture. I believe they are also how we will achieve our goals and those of our clients.

Thank you for your time and interest in our services. It was pleasure to talk to you
